Satisfying Your Current and Future Business Demands PSGI Modernizing and Enhancing PRISM®

PRISM Modernization Initiative

The message from the PRISM User Group Meeting last November was loud and clear, “Modernize PRISM!” This coincides with a recent iSeries survey indicating 42% of IT professionals believe the highest priority project is modernizing their current enterprise systems. A recent Aberdeen Group report cites very positive results for mid-market companies running AS/400 applications (reply or call us for a copy). Modernization projects frequently result in a 30 to 1 reduction in the number of ERP screens for users to navigate. They typically start delivering value in weeks not years. **Studies have shown a 35 to 1 cost advantage of modernization vs. ERP replacement!**

PSGI is off and running! With the PRISM User Community’s assistance, PSGI’s **PRISM modernization initiative** will provide a framework that will cost effectively satisfy today’s business requirements and offer a path for future development in a fraction of the time and cost of migrating to a new application. PSGI’s framework fulfills immediate needs placing PRISM in a modern framework with a simplified menu structure, advanced searching and navigation, and even supports Web, wireless, and Windows deployments. The picture on the right displays a sample of the framework and the concept of multiple 5250 screens now being viewed in a GUI environment incorporating information from multiple, heterogeneous applications.

If you would like to be a member of the modernization steering committee and provide your invaluable input, please reply to this email or give us a call.

PSGI's Proven PRISM Enhancement Portfolio

One of **PSGI's primary missions is to extend the life of PRISM** through expert customer support services, comprehensive consulting services, add-on products and services, and a **continuous stream of PRISM enhancements**. Our enhancements are business process improvements to PRISM proven at our customer sites. PSGI's PRISM Enhancements are 1) release independent, 2) constantly being augmented and 3) implemented free for all of our PRISM support customers. We are constantly evaluating enhancements we perform and enhancement requests we receive to determine their desirability to the overall PRISM Community. Having worked on more than 85 projects just last year, we plan more projects for our growing base of PRISM and World customers in 2007 and will continue to grow the portfolio. A sampling of the available enhancements includes:

- Customer Master Field Level Security
- Master/Associate Sequencing
- Resource Master Field Level Security
- Warehouse Specific Cost-Roll Up
- Forward or Backward Scheduling
- Allow PM Type/Name Change on Open schedule
- Production Model Copy/Mass-Change Function

For detail on these enhancements and others in our portfolio, please reply to this email or give us a call.

About Precision Solutions Group:

Precision Solutions Group, Inc. is driven to enhance the productive use of enterprise business systems through training, customer support, consulting, and software solutions. We strive for greater employee efficiency and the significant cost savings and higher ROI derived by getting more out of your existing investment in business systems. Companies like Baxter Healthcare, Intertape Polymer Group, Cambro Manufacturing, and D.F. Stauffer's Biscuit Company depend on PSGI for software services and software support. PSGI personnel average more than 15 years of experience with the PRISM and World JDE products. For more information, see www.PrecisionSG.com.
