
**PRISM® User Group Meets
Shares Knowledge and Successes
PSGI Announces PRISM® Phoenix and Document eDelivery**

October 15, 2008

Nashville, TN -- Precision Solutions Group sponsored the 2008 PRISM User Group meeting entitled **Extending the Life and Value of Your Enterprise Systems**. 39 attendees representing 20 companies shared their PRISM knowledge and experiences providing extraordinary value to all who attended. 85% of the attendees said the meeting gave them greater confidence in the future of PRISM, 78% felt more control over PRISM's future and 90% rated collaboration with fellow PRISM users as delivering the highest value. Everyone plans to attend future PRISM User Group meetings!

"Excellent meeting - well worth the investment in time"

"There is always great information shared"

"Topics relevant to today's business concerns"

"Very professional and honest"

"It's great to interact with other PRISM fans and to share our knowledge (the good, the bad, and the ugly) and learn about innovative projects that we've never even considered"

The two-day meeting kicked off with a topical keynote presentation by Tech-Clarity's Jim Brown **Product Genealogy - Track and Trace for 2010 and Beyond**. With so many recent examples to draw on such as salmonella in salsa and melamine in Chinese milk, Jim discussed the business impact of recalls especially as we move to more complex, global supply chains and the role technology plays in "track and trace" and recalls.

Jeff Craft, a PSGI Senior Business Consultant, provided another highly relevant presentation of **PRISM and Lean Manufacturing**. Jeff illustrated the impact PRISM has in the areas of organization, metrics, logistics, manufacturing flow, and process control. Several attendees described their lean manufacturing implementations while others revealed their plans for rolling out Lean techniques.

Competition for the best **Braggin' Rights** story and the iPod prize was fierce. More than two dozen entries were considered ... too many for the group to judge so the winner was selected by a drawing. Braggin' Rights and the Open PRISM and PRISM User Group Discussions received "high value" grades. These discussions were focussed on improving PRISM and empowering the PRISM User Group.

PSGI's PRISM Modernization achieved the highest rating! PSGI announced **Phoenix**, the PSGI PRISM module which provides a graphical user interface and combines PRISM and non-PRISM applications in an integrated working environment with a modern framework and simplified menus.

PSGI announced the availability of the PRISM **Document eDelivery** application. Document eDelivery provides contact management, a document delivery framework for *any* PRISM module, and integration to Quadrant Software's FastFax for eFax & eMail. Document eDelivery ensures the correct PRISM documents are delivered to the desired recipients in the requested format in a timely fashion.

Attendees and solution experts took the podium presenting topics such as:

- Cost-Price Change Notification System
- Paperless Customer Service
- PRISM and IBM O/S V6R1 Overview
- Out of the Box Development with PRISM
- Devil is in the Detail of Material Usage Variance
- PRISM Education: How PRISM Captures Overhead Costs
- PRISM Education: PRISM Adds Fuel and Freight Surcharges
- PRISM Education: Product Traceability in PRISM

*We met our primary goal of attendees sharing ways of ensuring PRISM addresses contemporary business requirements and providing a platform for companies to discuss their PRISM successes. Attendees energetically led and participated in discussions about what they have accomplished with PRISM. They enjoyed working together to extend the lives of their PRISM implementations. It was an outstanding meeting! Thank you, 2008 PRISM User Group Meeting Attendees.
(Larry Dube, PSGI President)*

All attendees will receive a CD with the presentations, training, and handouts from the meeting. If you would also like a copy, click [here](#) or
