## **Pandol Brothers Selects Solzon Corporation for RFID Project**

**Delano, CA and Nashua, NH, July 1, 2006** – Pandol Brothers, Inc. today announced that they have chosen Solzon Corporation to participate in their RFID initiative. Pandol, a leading supplier of high quality produce to global markets is planning to implement RFID during the second half of 2006. Solzon will provide systems integration services including selection and installation of hardware components, optimization of tag placement and the integration of Solzon's RFID for iSeries™ middleware solution with Pandol's existing supply chain system.

"We are pleased to announce the selection of Solzon as our RFID solution provider," said Robert Hughes, Pandol's Director of Information Systems. "We believe their deep understanding of the IBM iSeries platform and their proven RFID integration experience will allow us to adopt and rollout RFID technology rapidly and efficiently. We believe this is a strategic technology that will allow us to deliver improved service to our customers in the future."

"We are excited about working with Pandol as they implement RFID in their various operations," said Phil Przybyszewski, President of Solzon Corporation. "The experience we've gained through previous RFID engagements will be leveraged as we work with Pandol this year. Pandol has some unique requirements given the nature of their products and we're looking forward to addressing these during the implementation."

### **About Pandol Brothers, Inc.:**
